

Industrial Nonwoven Wipes Rewinding Machine

Industrial nonwoven wipes rewinding machine is a professional equipment for rewinding the jumbo roll into small roll of nonwoven roll.

Processing:

Jumbo roll load on the machine-Edge cutting-Rewinding-Auto stop when reach the setting length-Cutting-Final Product

Features:

1. Adopt frequency converter (Delta) speed regulation, and the production speed can be adjusted.

2. The reel adopts the tension air expansion shaft; the unwinding tension adopts the electromagnetic powder brake, and the tension is conveniently adjusted according to the different reeling cylinders.
3. Special winding mechanism with ultra-small paper core, the die specifications can be adjusted arbitrarily, and the loading and unloading operation is simple.
4. Automatic trimming mechanism, equipped with a fan, wind blowing edge material, automatic counting device.
5. Rewinding elastic adjustment mechanism.
6. Optional configuration: automatic correction system.

Technical Data:

Name: Industrial nonwoven wipes rewinding machine

Model: PPD-INR600

Finished product size: $\leq \Phi 100$ mm \times width 600mm

Raw material core specification: 76.2mm (=3")

Finished paper core specifications: $\Phi 8$ -40mm adjustable, or specified

Rewinding uniformity: common configuration ≤ 1 mm; plus automatic correction system ≤ 0.5 mm

Material size: $\leq \Phi 1200$ mm \times width 600mm

Processing capacity: Rewinding 80-120 m / min

Voltage: 220V, 50HZ

Required power: 0.75kw

Dimensions: L: 1800 \times W: 1200 \times H 1200mm

Machine weight: 350kg

NOTE: Different sizes can be customized.
